EXTRACTS FROM LETTERS.

Frankfort, (Ky.) January 14th, 1843.

Dear Brother:

We closed the old Consum (?) the 1st of the month, and myself and Giles have comenced the business.

We pay father eight hundred dollars - He has the hire of the negros and we pay him board, in all thirteen hundred a year, which will be enough to support him, and we have the use of his ~~money~~ means.

You wished me to sell Sidney - it is impossible to sell her for anything like her value on account the scarcity of money - the times are getting harder every day. - The note that Major left has been paid.

Give my love to Amanda. (Signed) L.M. Bacon.

Philadelphia, Aug. 6th,

Write me at Frankfort. (Ky.) (Signed) Your Brother L.M. Bacon.

Chapter 1
Introduction
The purpose of this study is to investigate the effects of the independent variable on the dependent variable. The study is designed to provide a comprehensive overview of the current state of research in this field. The research is organized into several chapters, each focusing on a specific aspect of the topic. The first chapter provides a general overview of the field, while the subsequent chapters delve into more detailed analyses of the data. The final chapter summarizes the findings and discusses their implications for future research.

Chapter 2
Literature Review
This chapter reviews the existing literature on the topic, highlighting the key findings and identifying gaps in the current research. The review is organized into several sections, each focusing on a different aspect of the literature. The first section discusses the theoretical framework of the study, while the subsequent sections review empirical studies that have examined the relationship between the independent and dependent variables. The final section discusses the methodological approaches used in the literature and identifies areas for further research.

Chapter 3
Methodology
This chapter describes the research design and the methods used to collect and analyze the data. The study is a quantitative study, and the data were collected through a series of experiments. The experimental design was a between-subjects design, and the data were analyzed using a series of statistical tests. The first section describes the experimental design, while the subsequent sections describe the data collection and analysis procedures.

Chapter 4
Results
This chapter presents the results of the study, showing the effects of the independent variable on the dependent variable. The results are presented in a series of tables and figures, and the statistical significance of the findings is discussed. The first section presents the results of the descriptive statistics, while the subsequent sections present the results of the inferential statistics.

Chapter 5
Conclusion
This chapter summarizes the findings of the study and discusses their implications for future research. The study has shown that the independent variable has a significant effect on the dependent variable, and these findings have important implications for the field. The final section discusses the limitations of the study and suggests areas for further research.
